

It is the unchanged development philosophy of Penda Group to advocate green environmental protection, implement energy-saving production and create low-carbon life. For over 5 years after its establishment, Penda Group has been adhering to the consistent innovative spirit, making huge investment in kiln waste heat utilization, motor frequency conversion and energy saving, tail gas dedusting and desulfurization, waste recovery and so on, recovering and saving lots of energy. Besides through numerical control and automation upgrading of production equipment, we utilize computer control technology to realize production automation, to increase efficiency and precision, and to provide you with more colorful and environment-friendly architectural ceramic products.

Pearl jade series

Adopted Waterfall flowing loading lines technology, imitating natural rock integration as well as flowing effect to create multi-leveled and changeable tiny lines, tile surface has 2 kinds of colors as light and dark with comfortable and smooth effect for natural, profound, cubic and crystal vein effect. Refined raw materials and excellent water-wearing materials for environmental protection after long time firing, Products of this series have deep connotation, splendid and gorgeous paving effect, suitable for modern and vogue, individual constructions, artistic decorative walls and excellent vogue shopping circles and hotels.

CAVERN STONE

CAVERN STONE

Adopting advanced & refined processes, comparing with natural marble, tiles have advantages as high brightness, low water absorptions, high hardness & wearing ability, no radioactivity, etc, especially suitable for large houses as well as public construction engineering space due to its surface brightness high up to 90-95. 1300 degree high temperature produces 8 degree molh's hardness, the hardest among floor tiles. Water absorption only 0.02% 5 to 10 times higher than euro standard and no color difference used for a long time. With outstanding deco effect of natural granite and marble stone, with wonderful performances of normal polished tiles as anti-wearing, anti-corrosion, high hardness, and with characteristics as stable quality, wide usage, tiles of this series are quite popular deco materials by mass consumers.

 1200x1200mm

Crystal Micronized

with top multi-functional computerized free loading system, the tile has clear and delicate vein with strong sense of level and high brightness. Tiles easily match with each other with perfect stone imitating effect, and it has not only outstanding merits of vitrified tiles, but also has incomparable micro-crystal sense. It has more superior characters as condensed quality, straight and smooth, super brightness, super strength, jadelike quality, and strong anti-chemical anti-wearing ability.
